Assumptions & Unresolved Decisions

ID	ASSUMPTION	IMPACT	RISK	STATUS
ASM-01	`number` field in registration is normalized to `phone_number`. No govt ID collected.	Simplifies PII handling.	May miss business need for ID verification.	**Approved Default**
ASM-02	Grain distribution unit is kilograms (kg).	Standardizes quantity math.	Business may prefer liters or bags.	**Pending Approval**
ASM-03	Offline nodes can operate for 72 hours before mandatory sync.	Defines outbox storage sizing.	Nodes offline longer will halt distribution.	**Approved Default**
ASM-04	Quota leases are allocated daily.	Prevents real-time sync need.	Inefficient if traffic is highly localized.	**Pending Approval**
ASM-05	Personal ID recovery requires OTP to registered phone.	Secure, no password needed.	SIM swap attacks possible.	**Approved Default**
